

Here's how to create a 3D drawcord, that is easy to recolor, using only just one pattern...a rectangle!

- ▶ Create your rectangle piece and stitch the sides together
- ▶ On the waistband piece, use the Ellipse tool to draw a circle internal line. This is the opening of the drawcord and where it will be stitched to top edge.
- ▶ Don't forget to change your 3D Layer to a higher number so that the drawcord stays on top of the other pieces
